DETAILED ACTION

Claim Objections

1. Claim 5 is objected to because of the following informalities: the preamble of this claim should match that of the independent claim. Also, "first support" has no antecedent basis and should be changed to "first guide."

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 9 recites the limitation "the base plate" in line 11. Claim 12 recites the limitation "the guide support" in line 6. There is insufficient antecedent basis for these limitations in the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,623,939 to Wortich.

Wortich discloses an apparatus in Figure 2 for supporting a device to be introduced into the body. The device includes a base (20) with adhesive backing (column 4, line 37-40); a guide member (40) with a channel (44); and a guide support

(30) that releasably captures the guide member (40). Figure 4 illustrates a closed position of the guide support and Figures 5 and 6 illustrate an open position of the guide support (40). The guide support includes two portions that pivot relative to one another to allow for connection to the guide member.
